**Labor Profile by HCPCS Code**
**(LABDET)**

CPEP: The Clinical Practice Expert Panel (abbreviated CPEP) that provided the estimates for the associated service.

FAM: The grouping ("family") of HCPCS codes to which the service was assigned for the purpose of facilitating development of resource estimates by the CPEPs.

PROCCODE: The HCFA Common Procedure Coding System (HCPCS) Code for the specified service.

ISREF: For the specified service, this variable indicates whether the service was a reference service (profiled during the first round of CPEP meetings).

STAFTYPE: Numeric Code for staff type, assigned by Abt Associates Inc.

DESC: Description of the staff type.

RATE: For the specified staff type, this variable is the estimated rate of total compensation, expressed in dollars per minute.

IN: For the specified service, this variable indicates whether the service was profiled for the "in-office" location.

OUT: For the specified service, this variable indicates whether the service was profiled for the "out-office" location.

GO_I: Services in the G0 period occur within 24 hours before the performance of a procedure. This variable contains the minutes of clinical labor for services and/or visits provided during this 24-hour pre-procedure period of an in-office procedure for the specified staff type (see STAFTYPE variable).

G1_I: Services in the G1 period occur during the provision of the service regardless of the service's global status code.[1] This variable contains the minutes of clinical labor for the provision of the in-office service itself for the specified staff type (see STAFTYPE variable).

G1X_I: Services in the G1X period commence with the first post-procedure office visit and end with the expiration of the global period. This variable contains the minutes of clinical labor for all G1X period services and/or visits related to an in-office procedure for the specified staff type (see STAFTYPE variable).

---

[1]See the *User's Guide* for an extended discussion of the relationship between the resources included in the G1 period and the global status code.

G2_I: Services in the G2 period occur during the provision of the service itself (regardless of the service's global status) and within 24 hours before the performance of a procedure (for global status codes with a 24 hour pre-service window). This variable contains the minutes of administrative labor for services and/or visits in the G2 period related to an in-office procedure for the specified staff type (see STAFTYPE variable).

G2X_I: Services in the G2X period commence with the first post-procedure office visit and end with the expiration of the global period. This variable contains the minutes of administrative labor for all G2X period services and/or visits related to an in-office procedure for the specified staff type (see STAFTYPE variable).

G0_O: Services in the G0 period occur within 24 hours before the performance of a procedure. This variable contains the minutes of clinical labor for services and/or visits provided during this 24-hour pre-procedure period of an out-office procedure for the specified staff type (see STAFTYPE variable).

G1_O: Services in the G1 period occur during the provision of the service regardless of the service's global status code.[2] This variable contains the minutes of clinical labor for the provision of the out-office service itself for the specified staff type (see STAFTYPE variable). When the service is a procedure performed on an inpatient basis, the G1_O period includes services and visits provided by practice staff during the hospital stay.

G1X_O: Services in the G1X period commence with the first post-procedure office visit and end with the expiration of the global period. This variable contains the minutes of clinical labor for all G1X period services and/or visits related to an out-office procedure for the specified staff type (see STAFTYPE variable).

G2_O: Services in the G2 period occur during the provision of the service itself (regardless of the service's global status) and within 24 hours before the performance of a procedure (for global status codes with a 24 hour pre-service window). This variable contains the minutes of administrative labor for services and/or visits in the G2 period related to out-office procedure for the specified staff type (see STAFTYPE variable).

G2X_O: Services in the G2X period commence with the first post-procedure office visit and end with the expiration of the global period. This variable contains the minutes of administrative labor for all G2X services and/or visits related to an out-office procedure for the specified staff type (see STAFTYPE variable).
